

## Customs Expert – Supply Chain Department

For our client, a leading player in the agri-food and industrial processing sector we are looking for a Customs Expert to join the Supply Chain team. You will have a competitive compensation package, a stable role within an industry-leading organization and access to professional development opportunities in an international environment.

### Key Responsibilities

- Validate product information and review transport/commercial documentation.
- Perform TARIC tariff classification and calculate applicable duties and VAT.
- Prepare and submit customs declarations in electronic systems (AES-RO, SNI, e-Customs).
- Communicate with customs authorities during inspections and monitor declaration status.
- Maintain internal customs records and ensure traceability, particularly under EIDR authorization.
- Prepare supplementary declarations, ensure correct application of fiscal facilities, and support audits.
- Provide internal guidance to procurement, logistics, and finance teams on customs requirements while monitoring legislative developments to support internal training and compliance initiatives.

### Requirements

- University degree in International Trade, Logistics, Economics, Commercial Law or related fields.
- Relevant certification or specialized customs training.
- Minimum **3 years of experience** in customs operations (import/export, special regimes).
- Strong knowledge of customs legislation and experience with customs systems (AES-RO, SNI, RCDPS).
- Intermediate–advanced English skills.
- High attention to detail, integrity, and ability to work under tight deadlines.
